

# Miasms, Nosodes, Sarcodes, Fungi, Imponderabilia & Intercurrent Remedies

## Session 1; Sarcodes - Part 1

By Dr Gaurang Gaikwad

### Sarcodes – Remedies prepared from Healthy Living Tissues.

1. Hormones – Folliculinum, Testosterone, Histaminum, Oestrogen, Dopamine, Cortisone, Growth Hormone, Pepsinum, Progesterone, Parathyroidinum
2. Organs (humans) – Pituitary gland, testes, endometrium.
3. Organs (animals) – Oophorinum, Thyroidinum, Pancreatinum.
4. Nervous system – Thalamus, Hypothalamus, Pituitary gland, Pituitary ant, pituitary post, DNA, RNA

### SPHERE OF ACTION OF THE SARCOCES –

1. Developmental delay – Pituitary gland, DNA, RNA, Thyroidinum, Growth Hormone, Hypothalamus
2. Sexual disorder – Testes, Folliculinum, Oophorinum, Thyroidinum, Endometrium, Pituitary gland, Progesterone, Oestrogen
3. Thyroid disorders – Thyroidinum, Pituitary gland, Pituitary anterior
4. GIT – Pepsinum, Pancreatinum, Pituitary gland.
5. Musculoskeletal system – Thyroidinum, Parathyroidinum, Oestrogen

6. Menopausal Issues – Oophorinum, Pituitary gland, Folliculinum, Thyroidinum.
7. Nervous system – Thalamus, Pituitary gland.

### Case of Migraine and Diabetes (13/M)

Constitutionally - Medorrhinum (sleeps on abdomen, serrated teeth, unibrow, etc)

Rx – **Medo** 1m, LM 4 OD 3 days.

F U – Did well on Medo, No headache in last 2 months. Bed wetting is better.

Violent behaviour is better.

Later on there was sudden increased in insulin levels.

Insulin fasting – 37.34

He used to have too much of junk food.

**(‘Too much’ and ‘Restlessness’ is a pattern of sarcodes.)**

Rx – **Insulinum** 6c od 10 days, 30c bd 7 days, 200c bd 3 days. Wait and if needed few weeks later add **Nat sulph** 12 X 30 days (diabetes – liver)

F.U – Within 3 months his insulin fasting became – 9.10 (normal).

### INSULINUM –

Dr P Sankaran and his Assistant Matani published clinical observations with insulin in potency. Some of the symptoms are- hair falling. Pain in calf muscles. Drowsiness. Burning in soles. Weakness after stool.

Clinical indications of Insulinum –

**Fluctuating Blood Sugar** - Insulin 30 c OD 15 days.

**When there are no other characteristic symptoms – just diabetes. No peculiarity pointing towards sarcodes.**

Juvenile diabetes. Contraindicated in constipation. Too much hunger.

Ulcers, bed sores, insulinum is called **deeper hepar sulph, silicea**.

Insulin children – Both extremes: **children who are obese and have a lot of junk food**/ thin children who don't put on weight.

Ghosh writes, Children who have junk food with **rose tinge on cheeks** and **cina like mind (cranky)**.

Its very important to have **liver disorder** as a concomitant.

- In a case of Deep non-healing ulcer -insulinum 6c bd 15days was given after merc cor 30 bd 7 days with great results.

(**insulinum** given in 6c potency in cases with no peculiar symptoms twice a day for 2-3 weeks. When I see some of the symptoms noted above I give it in 30 potency OD 25 days.)

- In a case of age related macular degeneration of eye which was doing well on crotalus horridus, and got all well. After a few years she came back to us at 85 yrs of age with ataxia and osteoporosis. In such cases of chronic osteoporosis, the remedy that I use a lot is **parathyroidinum** 30c bd 3 days.

I use this remedy **Parathyroidinum** wherever there is calcification – like atherosclerosis in the heart, recurrent renal calculi. **The tendency to calcification** itself must remind you of this remedy.

- I also used this remedy in Peyronie's diseases, in which there is calcification in the tunica albuginea penis, due to repeated penile injury during sex/ physical activity. To this patient, parathyroidinum 30c bd 3 days followed by thiosinaminum 6c for 50 days was given with great results. (this was a clinical prescription, as there were no peculiarities in the case)

#### **Case of 42 yrs old man suffering from acidity**

Endoscopy showed – Non erosive pangastritis with fundic gland polyps.

His main stress -someone in the family disrespected him – affected him very deeply.

Rubrics –

Phatak rep; sensitive

Mind; interruption; ailments from, agg

Generalities; cold agg

Phatak rep; misdeeds of others agg

The remedy that came up was colchicum.

With colchicum he was okay. But in the next 2-3 months he did not change much.

F.U - He had a victim feeling. You Vs Me. His reaction is suppression.

**Two ways to go ahead, when you fail–**

1. Think of **changing the remedy.**
2. Think of an **intercurrent remedy.**

**Two important sarcodes for digestive organs are –**

1. **Pancreatinum**
2. **Pepsinum**

**Pancreatinum** (produced from the pancreas of the sheep) –

In diabetes cases – think of it when insulinum fails.

Clinicals in Clarke – Diabetes, pancreatic. Diarrhoea. Mumps. Gout. Pancreas, disease of.

Just You See by Dr Sarkar – when there is too much burning like iris versicolor, think of pancreatinum.

Since its produced from the pancreas of the sheep, we see the pattern of the sheep in the mind of this remedy.

**Lac Ovis (Sheep's Milk)** – they remind you of magnesium group of remedies – they are repressed, shy, suppressed.

Patterns – Shy, Withdrawn, Self loathing; inadequate, Attacked, Forsaken, uncomplaining, Calm, Low in energy, Good Samaritan, Principles, Equality; Fairness. Hurried.

So, **pancreatinum has a mind state like magnesium (lac ovis- withdrawn) with the digestive issues/ acid reflux.**

**Book Suggestions –**
